SUMMARY

Results-driven MERN Stack Developer with 6 months of internship experience in designing and developing responsive web applications using MongoDB, Express.js, React.js, and Node.js. Proven ability to build scalable full-stack applications, develop RESTful APIs, and implement dynamic front-end interfaces. Experienced in working within agile teams, troubleshooting complex issues, and optimizing performance for seamless user experiences. Passionate about continuous learning and adopting best coding practices to deliver clean, maintainable, and efficient solutions.

EDUCATION

CSE, Computer Science and Engineering Graduated December 2024 6.65 Cgpa

Jawaharlal Nehru Technological University Hyderabad

Talla Padmavathi College of Engineering

Relevant coursework: Machine Learning, Data Structures and Algorithms, Full Stack Web Development, Object-Oriented Programming, Database Management Systems, Hardware Design Languages and Programmable Logic

TECHNICAL SKILLS

Frameworks: ReactJS, ExpressJs, NodeJs, TailwindCss, DaisyUI

Databases: MongoDB, MySQL

Programming: Python, Java, JavaScript, HTML, CSS

Certifications: Java Programming Crash Course - 09/2024

Soft Skills: Teamwork, Communication, Problem-Solving, Time Management, Adaptability

PROFESSIONAL EXPERIENCE

Vangrove Tech, Hyderabad, Manjeera Trinity -KBHP: Software Engineer intern June 2024 – Dec 2024

- Built 5+ microfrontend modules using React.js, increasing code reusability and reducing development time by 30%.
- Integrated 10+ RESTful APIs to enable real-time data exchange, reducing page load latency by 25%.
- Optimized frontend performance using lazy loading and code splitting, resulting in a 20% faster initial load time.

ACADEMIC PROJECTS

Chatty App – Real-time Chat Application **GitHub** 2024

Built a real-time chat application enabling seamless communication using MERN stack and Socket.io.

- Developed interactive frontend using React.js and managed real-time updates with Socket.io
- Created RESTful API endpoints and WebSocket connections using Node.js and Express
- Integrated MongoDB for storing user data and chat history efficiently

E-commerce Product Filtering Module **GitHub** 2024

Created a dynamic product filtering and sorting feature for an e-commerce site.

- Built reusable microfrontend components with React.js
- Integrated RESTful APIs to fetch and filter product data dynamically
- Enhanced frontend performance using lazy loading and modular architecture

Recipe Finder Web App **GitHub** 2023

Created a responsive web application to search recipes using an external API.

- Developed the frontend using HTML, CSS, and vanilla JavaScript
- Integrated third-party recipe API for dynamic search functionality
- Focused on clean UI and responsive design for a smooth user experience

OTHER EXPERIENCE

Oak Academy, Online: MERN Stack Development Certification Aug 2023 – Dec 2023

- Gained hands-on experience in building full-stack applications using MongoDB, Express.js, React.js, and Node.js
- Completed real-time projects demonstrating integration of front-end and back-end technologies
